DISCIPLINES

Accounting

Accounting is the accurate and systematic recording, reporting, and analysis of the financial transactions of a business, allowing the company to analyse its financial performance. Accounting also involves critically analysing information, managing risks and taking action when necessary.

While bookkeepers or auditors focus on the details of the accounts, accountants look at the bigger picture that the numbers provide. The study of accounting would involve an in-depth understanding of bookkeeping and finance, as well as business.

Actuarial Science

Actuarial science is the extensive study of mathematics, probability, statistics, finance and economics. Most traditional actuarial disciplines fall into two main categories: life and non-life.

Life actuaries, which include health and pension actuaries, primarily deal with mortality risk and investment risk.

Non-life actuaries, also known as property and casualty or general insurance actuaries, deal with both physical and legal risks that affect people or their property.

Digital Marketing and Analytics

With widespread online buying behaviour and businesses making decisions based on data-driven initiatives; there is an impending growth in the demand for data scientists and digital marketers. The new markets in social commerce, social media, e-commerce, mobile marketing and digital markets create in-demand professionals in the areas of digital marketing and analytics. The specialisation in digital marketing and analytics is highly practical and will provide graduates with the necessary skillsets to meet employers' need for qualified digital marketers and data analytics experts.

Digital Business and Transformation

Digital Business and Transformation states to the use of digital technologies to transform the way a business operates, develop new product/service, and improve customer engagement. It involves redesigning business model and strategy and leveraging digital skills, such as data analytics and digital transformation. Digital business and transformation enhances business operational efficiency and supports innovation in today's digital era.

Finance

Finance is a broad term that describes the study of how money is managed and the actual process of acquiring the needed funds. It's a highly regulated, competitive and rapidly-changing sector that is heavily influenced by globalisation, technological change, deregulation and international integration.

The study of finance encompasses personal finance, corporate finance and public finance, including knowledge of business, macro and microeconomics as well as mathematics, amongst others.

Fintech

Fintech, a term known for financial technology, within accounting discipline is an extended scope of accounting information systems. Fintech involves the usage of technology and innovation in the provision of financial services to various stakeholders such as consumers and businesses. Fintech is an area that is gaining traction locally and globally due to the synergy that is created through the combination of finance and technology in the delivery and use of financial services. The study of fintech in accounting encompasses unique and distinctive areas such as cloud computing, computerised accounting information systems, fundamentals of information technology, secured software systems and blockchain.

Marketing

Marketing is the ability to communicate the value of a product or service to the target consumers. Marketing is more than just sales or promotions – it's about understanding consumer psychology, consumer trends, market needs, and then tying that in with the product, service or organisation.

Marketing essentially includes the coordination of four elements known as the 4Ps of marketing: product, price, placement and promotional strategy. Studying Marketing involves the study of marketing processes, concepts and techniques, and understanding the local and global business environment.

Management

Management involves the many aspects of running and managing an organisation efficiently, to ensure that it meets its specific goals or targets. It includes organising people and resources, leading and coordinating teams as well as implementing major decisions for the organisation.

A study in Management will involve the grounding theories and principles of business ethics, entrepreneurship, international business, leadership and organisational theories.

Global business and sustainability

Global business and sustainability refers to the practice of conducting international business operations in a way that is environmentally, socially, and economically sustainable. Global business describes commercial transactions that take place across intentional borders, dealing with trade, exchange of capital, logistics, supply chain and cultural factors. Sustainability integrates environmental, social and governance practices into strategy and decision making and creates new business opportunities.

Taylor's Centre of Accountancy Studies

ABOUT TAYLOR'S CENTRE FOR ACCOUNTANCY STUDIES (TCAS)

Taylor's Centre for Accountancy Studies (TCAS) was established by the School of Accounting and Finance in March 2022 as a one-stop centre for our students to have a holistic and enhanced learning experience from Undergraduate Studies to Professional Studies through real-world and lifelong learning.

At TCAS, we believe that a professional accounting qualification will provide the pathway into the fascinating world of accounting. Besides providing undergraduate students with advice and counselling on professional studies modules, TCAS will work closely with professional bodies to promote awareness about professional programmes among undergraduate students through jointly organising relevant talks, workshops and webinars, including on soft skills throughout the year; to work closely with employers to ensure opportunities to obtain internship or graduate placements with the top accounting firms as well as multinational corporations; and to work with relevant bodies to contribute towards training more Bumiputera accountants in Malaysia and exposing students to the latest accounting developments and financial technology so that students will be ready for the digital working environment.

Thus, our vision is to be a leading one-stop centre for accountancy studies that produces accounting undergraduates with professional qualifications to meet the standards of the accounting profession in Malaysia.

NURTURING **ENTREPRENEURS & BUSINESS LEADERS**

TEAM ENTREPRENEURSHIP PROGRAMME

Offered by Taylor's Business School, Bachelor of Entrepreneurship (Honours) In Team Entrepreneurship is an innovative, highly experiential and student-centered approach based on learning through project work, team support, coaching and enhancing personal competencies.

This programme is inspired by the Finnish Team Academy programme, Finland. The syllabus in this programme emphasises three core areas, the Enterprise strand, Team strand, and Individual strand.

ENTREPRENEURSHIP INCUBATOR

Students will integrate all their learnings and demonstrate their competency, professionalism and entrepreneurship in applying the knowledge they have acquired throughout their course. In doing so, they gain lifelong skills that prepares them for the working environment.

SOCIAL ENTREPRENEURSHIP

More than just being driven academically, our students are encouraged to use their business acumen to address social issues and develop business solutions to improve the quality of life of affected communities. Challenged with limited budgets and resources, they are required to develop creative and cost-effective proposals to achieve their business goals.

This enriches their practical experience in running a business, enabling them to apply their knowledge gained in the classroom to actual projects at the same time enhancing ethical, interpersonal, communication, leadership and problem-solving skills.

MEMORANDUM OF UNDERSTANDING (MoU) WITH ENTREPRENEURS' ORGANIZATION (EO) MALAYSIA

Taylor's University and Entrepreneurs' Organization (EO) Malaysia signed a MoU on 21 October 2016 to strengthen, promote and develop co-operation between them, specifically in promoting entrepreneurship among youth at the university.

This collaboration enhances Taylor's Business School's aim in developing purposeful business leaders of the future. It opens up opportunities for students to engage with leading, successful entrepreneurs in Malaysia. Members of EO Malaysia will share their entrepreneurship experience and provide mentorship pairing with our students.

MULTI-DISCIPLINARY LEARNING EXPERIENCE, REAL-WORLD SOLUTIONS

At Taylor's Business School, experience is at the heart of the learning process. Our carefully tailored approach combines a strong foundation of theories, as well as avenues to apply these theories into practical settings to maximise learning. In order to achieve this, we employ a variety of teaching and learning strategies as well as multidisciplinary learning experience where students are exposed to real-life scenarios and industry-relevant challenges that enhance student engagement, both inside and outside the classroom.

Tomorrow Burger

Tomorrow Burger began with a significant goal in mind: eating for a greener and cleaner tomorrow. The insect-based patty is made with protein powder derived from Black Soldier Fly larvae. By using insect protein as the distinctive ingredient, this reimagining of the conventional meat patty is filled with more protein and other nutrients. It maintains the same flavour and texture while providing consumers with a more sustainable protein option, fostering a circular economy.

Taylor's Techstar Startup

Taylor's University Student Council (TUSC) and BizPod co-organise with Techstars for Techstars Startup Weekend Sustainability Selangor which aims to serve as a platform for aspiring entrepreneurs to pitch their product ideas to real-life investors, for a chance to win a grant worth up to RM100,000 among other prizes.

During the event, teams get to build their innovative ideas from paper to a viable business and build their prototype. On the final day of the event, teams will pitch to investors and stand a chance to scale their businesses.

This capstone module is designed for students to develop the essential skills and knowledge to support their future careers in the accounting profession and/or as a manager in the business world.

Through multidisciplinary learning experience, students learn the intricacies of providing support and solutions to contemporary real-world issues through collaborations with other disciplines such as hospitality and management, by applying the knowledge acquired throughout their study in the various areas of accounting.

BizPod

BizPod is Taylor's University in-house hybrid Incubator and Accelerator for Entrepreneurs that provides a holistic four-stage structured, intensive entrepreneurship training program that develops the entrepreneurs from idea stage to funding acquisition for pre-seed, seed and venture capitalist.

The training modules are mainly built around a multidiscipline mentorship model by experienced professionals from various specialisations. BizPod also has unique co-working pods for budding entrepreneurs who wish to work in a collaborative space.

BizPod was established and launched in September 2018 by the Minister of Entrepreneurial Development, Datuk Mohd Redzuan Md Yusof and the Vice-Chancellor, Prof. Michael Driscoll.

The most impactful moment for me was when I was representing Taylor's for the HSBC Business Case Competition 2020. We had a lot of mentors and seniors to guide us and provide a very safe environment for us to make mistakes. And it just built confidence in me, where I thought, "Hey, I can actually do this."

Jolene Tiong

Peer Assisted Learning (PALs), a programme where seniors get to guide the juniors for specific modules, was where I discovered my passion for teaching. It makes me feel fulfilled as I get to share my knowledge.

Through the experience I've accumulated and the support from my lecturers, coaches, and peers, I feel I'm ready for the future.
