THE FUTURE

ENTERING THE 4th INDUSTRIAL REVOLUTION (4IR)

Many experts believe that we are entering the 4IR. This is an era fueled by technology, driving rapid changes to the world we live in. Technology is fusing the physical, digital and biological worlds, impacting economies, industries, and our life in general. The job market will change significantly in the future, whereby the demand for different skills beyond academic skills rises as the world sees advancement in Artificial Intelligence, Virtual Reality, Augmented Reality and Robotics to name a few.

The impact on education and curriculum is inevitable, and in future, cognitive skills will be less in demand, but a balance of both academic and soft skills will become priority. Creative-based skills such as critical thinking and collaboration will be sought-after in the future, according to a World Economic Forum report titled 'The Future of Jobs'.

Here at Taylor's College, we provide the best of innovative teaching and learning methods to ensure that our students are future-ready. It is more than just education, it is about providing a holistic learning experience.
