WHY ARCHITECTURE, BUILDING & DESIGN AT TAYLOR'S?

Taylor'sphere, our balanced ecosystem of community, facilities and features, is focused on equipping students with intellect, creativity and practical wisdom to graduate in demand for the ever-evolving landscape. MULTIDISCIPLINARY LEARNING EXPERIENCE (MLE)

Taylor's was one of the pioneer institutions in the region to implement compulsory multidisciplinary projects across all its undergraduate programmes. Multidisciplinary solutions go beyond just collaborating, but rather having a good understanding of learning necessities across various disciplines against being discipline-specific which will no longer be enough

PUSHING BOUNDARIES

We endeavour to instil a desire to continuously improve the quality of the environment for individuals and the community at large, by challenging our students to not just 'think out-of-the-box' but to create their own box and break it'

TAYLOR'S CURRICULUM FRAMEWORK (TCF)

The first of-its-kind framework in Malaysia that allows you to mix and match your degree, thus gaining multiple specialties to enhance your employability

PROFESSIONAL RECOGNITION

Our Architecture and Quantity Surveying degrees are accredited by local and international professional boards that raise the bar of our graduates and ensure they meet international industry standards.

WORLD-CLASS STANDARDS & FACILITIES

Our campus is built with our students in mind – your university is your second home. Taylor's Lakeside Campus encompasses a modern, functional design with state-of-the-art facilities together with lush greenery and its trademark 5.5-acre lake; striking a balance between form and function to embody our modern approach and perspective in premium education with an approach to holistic growth outside the classroom.

PERSONALISED AI-POWERED LEARNING

As one of Malaysia's pioneering institutions in AI-driven innovation, we offer personalised one-on-one 24/7 tutoring, focused Q&A sessions, assessments and instant feedback, supported by our AI teaching assistant. Students enjoy an engaging experience that encourages self-directed growth and better understanding.

RESEARCH TO FUEL INNOVATION

Research at the School of Architecture, Building and Design (SABD) focuses on Innovative Tropical Cities. Our postgraduate research highlights social sustainability, heritage empowerment and innovative solutions in the context of tropical cities in Asia. We encourage digital innovation as a tool and solution to many of the diverse challenges faced by cities in the Indo-Pacific region.

Our students have visited Kampung Cina, Kuala Terengganu, to examine the site and produce detailed drawings used to restore a temple to its former glory, after it was partly ruined in a fire.

TAYLOR'S VORTEX XR LAB

Taylor's University has expanded its education from classroom and online lectures into the virtual world of extended reality (XR). XR is an emerging umbrella term describing current immersive technologies, namely augmented reality (AR), virtual reality (VR) and mixed reality (MR). The lab facilitates the virtual co-presence of learners and participants in a virtual metaverse.

Students, lecturers and staff can enter into a world where they can experience complete liberation from screen-bound experiences and venture into XR.

Jeffrey has worked in the WTA architecture and design studio in the Philippines previously and has participated in the construction of the Emergency Quarantine Centre during the pandemic. He now runs his own business and is also working in Johor.

INTAKES: FEBRUARY, APRIL & SEPTEMBER

The Bachelor of Science (Honours) in Architecture is a pre-professional programme accredited by LAM that provides a recognised qualification and offers a pathway for further studies towards becoming a Graduate Architect.

It is an integrated and interdependent study that aims to elevate conceptual underpinnings of science and arts to discover key factors in societal, cultural, technological, environmental, ecological, historical, political, economic and artistic developments, leading to the development and application of appropriate solutions to encounter the demand of rigorous shifting paradigms in the Asian context, and to embrace the challenges of a dynamic 21st century global society. The architectural pedagogy is committed to the processes of design as both speculative and analytical. In line with the overall ethos of Sustainable Tropical Architecture in Asian Urban Heritage, the curriculum includes primary core modules, that is further extended through a choice of complementary studies namely Extension in Heritage and Conservation, Extension in Sustainable Design, and Free Elective (Architecture Related).

What Our Students Say

Bernard Yap
American Degree Transfer Program (Computer Science major)

My most impactful experience at Taylor's is working with mentors at Taylor's Me.reka Makerspace (TMM), who provided me guidance, free resources, and tools to build Pinky the Umbrella Borrowing Machine, inspired by a random act of kindness.

Jizen Loh
Bachelor of Mass Communication (Honours) in Public Relations and Marketing

My achievements in fencing got me Taylor's Sports Scholarship, for which I'm truly grateful. At Taylor's, I was able to fulfil my vision of creating affordable quality niche sports goods by collaborating with my peers and becoming an entrepreneur.
